

April 2019

Job title: **MANAGER, GOVERNMENT PROJECTS**

Company Overview:

Rotoliptic is an engineering technology company located in beautiful Squamish, BC (40 minutes from Vancouver) leading the innovation of revolutionary pump technology. Our technology integrates a novel Rotoliptic pumping architecture, with superior benefits over incumbent technologies, including power, efficiency, and durability. Rotoliptic offers significant potential for career development and advancement, competitive compensation, and a company culture of fun, hard work, and celebration.

Position Overview & Responsibilities:

This is an intermediate level position for an engineer who has had exposure to the business and management sides of engineering. Experience in smaller, clean-tech companies would be ideal; exposure to the innovation process is critical. Reporting to the Chief Executive Officer, you will be connecting the dots between technology and business to grow and manage Rotoliptic's government funded programs. Your responsibilities will include sourcing and preparing grant applications for government funding, analysing, and presenting data, creating technical reports and presentations, and ensuring timely submission of program deliverables.

Skillset:

The successful applicant will possess the following credentials and will have demonstrated excellence in the following areas:

- BAsC/BEng in Engineering with preference given to Mechanical. A PEng is an asset but not necessary.
- A minimum of 5 years' work experience required.
- Experience working with funding proposals and deliverables from Canadian / provincial government agencies/programs (SDTC, NRCAN, IRAP, SRED, AI).
- Comfort communicating with all levels of government with respect to Rotoliptic's fit with new or existing government programs.
- Knowledge of Canadian and international clean technology mandates and opportunities.
- Collaborates well in a team environment that will include managing a cross-functional interface between technical, business, and administrative teams.
- Experience understanding complex problems then communicating them in a clear, concise manner to others.
- Project management skills including task tracking and the ability to understand project contract terms, project budgeting and cost tracking.
- Multi-faceted and multi-talented with the ability to jump in when needed

- Excellent written and verbal communications skills, strong technical writing capabilities.

In addition to technical skills, you also need to have these to be the right fit:

- Experience and comfort working in a R&D environment.
- Desire to learn.
- Desire to be involved in an organization at an early stage and contribute in shaping the company.
- Thrives on doing things that have not been done before (explorer mindset) and tackling challenging problems.

Rotoliptic needs talented people who are interested in building value, pushing boundaries, and contributing positively to its fast paced, fun, and rewarding team-based environment. If you feel that your background could be an asset to Rotoliptic, please forward your resume and cover letter, detailing your relevant skillset and experience, to info@rotoliptic.com.
