

Position:	VP, Operations	Contact:	careers@rotoliptic.com
Reports to:	CEO	Location:	Squamish, BC

Rotoliptic has an employment opportunity for a permanent, full-time Vice President of Operations, beginning as soon as possible in Squamish, BC. We are looking for an enthusiastically strong candidate to join the group in our main office as part of a dynamic (and fun!) team. This is a senior leadership position with the key responsibility of overseeing the Operations and Engineering team.

A bit about you:

- You are a competent and experienced **leader** – you are adept at bringing teams together and guiding groups to common goals.
- You have management and operations **experience** – your knowledge and ability in this area makes you an asset to the teams you are a part of.
- You have a proven track record of **completion** – having multiple balls in the air at any given moment is natural for you even with competing deadlines. You can move projects past the finish line on an accelerated timeline – on-spec, on-time, on-budget.

A bit of what the role looks like:

- Participate in on-going strategic planning sessions with Senior Leadership Team
- Manage, focus, and guide the Operations and Engineering team in coordination with the Commercial and Corporate Services teams
- Resource plan and manage to execute field deployments and product development
- Develop and track project plans and budgets for Operations and Engineering
- Develop and execute on manufacturing and supply chain strategy and budget, including a goal to reduce CoGS through commercial scale-up
- Oversee transition of technology from lab to field
- Ensure transparent delivery of technology for trials and resolution of issues with key customers

Some nice to haves:

- Knowledge and experience in heavy industry (especially artificial lift in Oil & Gas), whether with OEM's, operators, or service providers
- Experience in development and execution of a Health and Safety Program
- Materials expertise to guide and support our Materials Program

Company Overview:

Rotoliptic is an R&D startup that is transitioning to a sales and manufacturing company. Located in Squamish, BC, Rotoliptic has developed an innovative and revolutionary, proprietary new pump technology that we are in the process of delivering to market. We are a team of dedicated professionals and are looking for talented people that aim to build value, push boundaries, and contribute positively to our fast paced, fun, and rewarding team environment. Being based in Squamish, we love what we do and we love to get out and play - if you are interested in joining our team, please forward your resume and cover letter to tell us a bit about you!
